

May 29, 2007

To Whom It May Concern:

Robert H. Leslie, President/CEO of Lexstar Development & Construction, and I are partners in several business ventures, including the Ramada Plaza Suites, the Multiband Tower and the Staybridge Suites in Fargo, ND. I can affirm that all of these properties are upper-end, high-quality construction buildings.

The Multiband Tower is a beautiful 120,000 sqft, seven-story office building built in 2002 that consists of an underground parking garage plus six floors of tenant space, and an enclosed mechanical floor below the roof. Lexstar designed the building, developing an inspiring, open design that set a new standard in professionalism, high technology and functionality. Lexstar also served as the construction manager, and proved its skills at orchestrating all aspects of the complex construction process.

Based on my positive experience with Bob Leslie and Lexstar, when I developed the Staybridge Suites, I selected Lexstar to serve as the general contractor. The Staybridge Suites is an upscale, three-story, 80-unit extended-stay hotel that offers deluxe studio, one-bedroom and two-bedroom suites. Lexstar again delivered a high-quality building, and the Staybridge Suites opened in September of 2006.

In my long association with Bob, I have found him to be a man of vision who is steadfast in moving ahead to meet a goal. While numerous people talk about grand projects and ideas, Bob Leslie is the one person I know who actually figures out a way to get an exceptional or difficult project completed.

Lexstar Development & Construction has consistently proven its capabilities in all aspects of the design and construction process. I am pleased to offer this letter of recommendation for Lexstar.

Sincerely,

Dave Ekman
Chief Information Officer
Multiband Corporation
