To Whom It May Concern:

Six years ago, I entered into a partnership with Robert H. Leslie, President/CEO of Lexstar Development & Construction. We are among the major owners of the Multiband Tower, a state-of-the-art office and retail building which encompasses nearly 120,000 square feet of Grade A space.

The Multiband Tower was designed and constructed by Lexstar Development & Construction. The Lexstar building's highly unique design is an asset to Fargo's skyline. Lexstar's construction of the building, one of the most ambitious, integrated office complexes in North Dakota, was first quality.

Bob Leslie is a solid, dependable partner who has been totally committed to furthering the partnership. He believes in communications and has been consistently forthcoming with information.

Another of Bob's strengths is his creative approach to problem solving. He demonstrates an unparalleled tenacity and keeps coming at a problem from different directions until a resolution is found.

In summary, based on my experience with the construction of the Multiband Tower and on my relationship with Bob as a partner, I recommend both the company and the man.

Sincerely,

Greg Ness
